

KENKO™ DREAM PILLOW

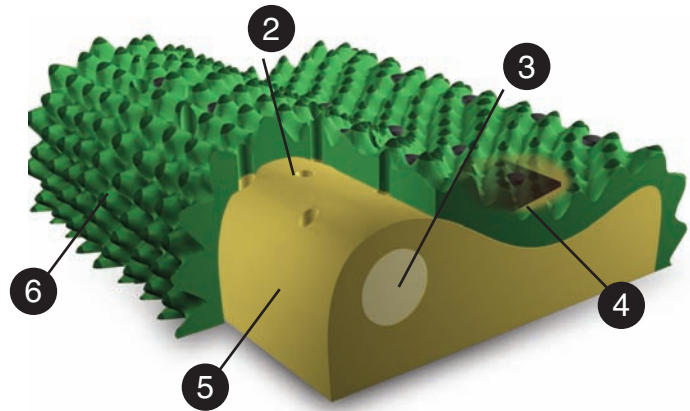

QUICK REFERENCE SHEET

- *Helps promote quality sleep*
- *Combines exceptional support with comfort*
- *Nikken Magnetic Technology*
- *Ceramic tile heat control*
- *Viscoelastic foam*
- *Rubberthane massaging effect*

Kenko Dream Pillow construction

- 1 Breathable top cover
- 2 Strategically placed magnets
- 3 Support foam cylinder
- 4 Ceramic tiles
- 5 Viscoelastic foam body
- 6 Nikken Rubberthane

KENKO DREAM PILLOW FEATURES AND BENEFITS:

- **Breathable outer cover** Provides ventilation, designed to release excess heat.
- **Ideal support**..... Shaped to conform to the natural contours of the head and neck.
- **Ceramic tiles** Absorb excess heat to draw it away from surface.
- **Nikken magnetic technology** Creates a cocoon of magnetism.
- **Viscoelastic technology** Memory foam that reshapes itself every time it is used.
- **Rubberthane foam** Passive massaging feel for relaxation.

KENKO™ DREAM DELUXE PILLOW

QUICK REFERENCE SHEET

THE FACTS

- An ordinary, flat pillow — no matter how soft or how firm — cannot give the kind of support and comfort that is provided by a surface especially shaped to fit the human form. The Kenko Dream Pillow helps keep your head and neck aligned in the ideal sleeping position, in a straight line from the spine to the top of the head.
- The fabric cover features a surface of carefully blended fibers for a combination of breathability and softness. It is like providing ventilation for your head.
- The core of the Kenko Dream Pillow is a cylinder of high-tech foam that helps the pillow retain its shape. You never need to fluff it up.
- Single-pole magnets in the Kenko Dream Pillow complete the cocoon of magnetism provided also by a Nikken Kenko mattress or pad and comforter. This helps to replicate the natural magnetic field of the Earth that humans have slept in for thousands of years.
- Viscoelastic foam — developed for use by NASA — is a unique material that uses body temperature and pressure to mold itself for a perfect, custom fit. It reshapes itself every time the sleeper moves.
- The Rubberthane surface has specially treated dual-density nodules that produce a relaxing, passive massaging effect.
- Small ceramic tiles deep within the pillow collect heat and withdraw it from the surface, to help keep you cool and comfortable.

PRODUCT INFORMATION	
ITEM CODE	DESCRIPTION
#1305	Kenko™ Dream Pillow
AVAILABILITY	
US: YES	CN: YES
FEATURED NIKKEN TECHNOLOGY	
Nikken Magnetic Technology (750 gauss), viscoelastic technology, Rubberthane technology, ceramic temperature regulation, orthopedic support	
MATERIALS CONTAINED IN PRODUCT	
Polyurethane foam, magnetic disks, ceramic, polyester fiber.	
CARE INSTRUCTIONS	
Spot clean only, do not saturate.	
WARRANTY INFORMATION	
1-year Nikken standard limited warranty	

CAUTION: If you use an electronic medical device such as a pacemaker, or have a magnetically sensitive surgical implant, do not use or wear magnetic products. Women in the first trimester of pregnancy, or anyone who has a health problem should first consult a physician before using magnetic products. Do not place magnetic products in direct contact with magnetically sensitive items such as watches, audio/video tapes, credit cards, portable electronic equipment, etc.

QUICK SHARING TIPS

Let someone try lying down with an ordinary pillow underneath the head, then replace it with the Kenko Dream Pillow. The improved support and comfortable angle of the head and neck will be noticed immediately.
